

# Danh Nguyen

Frontend Developer

[📍 The Netherlands](#) [📞 +31614673837](#) [✉️ nguyen.dtd@gmail.com](#) [🌐 https://www.danhnguyen.nl](#)

**Summary** Frontend Developer with 12+ years of experience specializing in Vue.js. Proven ability to lead frontend development projects, migrate legacy applications to Vue 3, and implement robust state management solutions with Vuex and Pinia. Passionate about building accessible and user-friendly web applications that deliver exceptional user experiences. Seeking a senior role where I can contribute my expertise to a dynamic team and drive innovation with Vue.js. Relocation to Indonesia planned for June 2025.

**Skills**

**Vue.js Expertise**  
Vue.js (Vue 1, Vue 2, Vue 3), Vuex/Pinia, Vue Router, Nuxt 3, Composition API

**Frontend Technologies**  
React (Redux, React Router), AngularJS, JavaScript (ES6+), Typescript, HTML5, CSS3 (SASS/SCSS, Bootstrap/Tailwind)

**Accessibility**  
WCAG 2.2, ARIA attributes, Semantic HTML, Screen Reader Compatibility (JAWS, NVDA, VoiceOver)

**Testing & Tools**  
Jest, Cypress, Selenium, Playwright, Git, GitHub, GitLab, Azure DevOps, Jira, Confluence, npm, yarn, Chrome Dev Tools

**Methodologies**  
Agile (Scrum/Kanban), BEM (Block Element Modifier), CI/CD (Continuous Integration/Continuous Deployment)

**Experience**

**Achmea - Zilveren Kruis** **06/2020 - Present**  
Senior Frontend Developer Leiden, The Netherlands

- Led the migration of several key applications from Vue 2 to Vue 3, leveraging the Composition API to enhance code maintainability and performance.
- Developed a Storybook library for reusable UI components, integrating them with REST APIs to streamline development and ensuring a consistent user experience across the application.
- Implemented accessibility best practices to achieve WCAG 2.1 AA compliance and deliver inclusive user experiences for all users.
- Collaborated effectively with cross-functional teams (designers, backend developers, product managers) to deliver high-quality solutions, including a new online sales funnel, that met business objectives and user needs.

**Developers.nl** **09/2016 - 05/2020**  
Frontend Developer Rotterdam, The Netherlands  
Logius

- Led the migration of the MijnOverheid frontend from Vue 1 to Vue 2, improving code maintainability and developer productivity.
- Improved the accessibility of the MijnOverheid portal for users with disabilities by implementing ARIA labels for complex form elements, keyboard navigation improvements, and ensuring compliance with WCAG 2.1 AA guidelines.
- Collaborated with backend developers and UX designers to deliver seamless and user-friendly digital government services.

Websight

- Developed the frontend for a public broadcasting web application, focusing on user experience and accessibility.
- Designed and implemented reusable UI components using React and Redux, ensuring efficient state management and integration with backend APIs.
- Delivered a seamless and engaging user experience for the public broadcasting web application.

CTIG

- Revamped the company website to improve user experience and information accessibility.
- Translated design mockups into functional web pages using HTML, CSS, PHP, and AngularJS, ensuring a user-friendly interface for accessing information.
- Improved the website's usability and information accessibility, making it easier for users to find and understand relevant information.

**Luminis** **01/2012 - 08/2016**  
Frontend Engineer Apeldoorn, The Netherlands  
Rabobank

- Developed automated integration tests and a user-friendly dashboard using AngularJS, improving data visualisation and accessibility for stakeholders.
- Improved the efficiency of the development process and delivered a user-friendly dashboard application.

Van Dijk Educatie

- Enhanced user interaction and website functionality by implementing dynamic features based on graphic designs.
- Converted graphic designs to Groovy Grails/HTML templates and implemented dynamic features using AngularJS, including features such as product categorisation and shopping cart functionality.
- Improved the user experience and functionality of the website, making it more engaging and efficient for users.

Monuta

- Developed and maintained web applications to provide dynamic content and user-specific functionalities related to funeral costs.
- Created interactive tools using AngularJS to calculate funeral costs, fetching dynamic data from the server and personalising functionality based on URL parameters.
- Delivered user-friendly web applications that provide accurate and personalised information about funeral costs.

PulseOn

- Developed and maintained modules for an e-learning platform to effectively display learning objects, objectives, and visualisations.
- Developed interactive modules for an e-learning platform using AngularJS, ensuring a user-friendly interface for both learners and instructors.
- Improved the e-learning platform's usability and functionality, making it more engaging and effective for users.

Luminis Rotterdam

- Created a responsive WordPress template to enable easy content management and a user-friendly experience.
- Designed and implemented a flexible website layout using HTML, CSS, and PHP, integrating with the WordPress content management system.
- Delivered a responsive and user-friendly WordPress template that is easy to manage and accessible across various devices.

Essent

- Developed and maintained websites for new product launches, ensuring mobile responsiveness and implementing features to enhance user experience.
- Collaborated with designers and backend developers to translate design mockups into interactive web pages, using HTML5, CSS3, jQuery, AJAX, and JSON. Additionally, managed the company's intranet, including content updates and migration to a new CMS.
- Successfully launched responsive and engaging websites for new products, improving user experience and online presence.

**Philips** **10/2007 - 09/2011**  
Online Service Expert Eindhoven, The Netherlands

- Ensured accurate and consistent content display across multiple languages for the Philips TV and Male Grooming platforms.
- Managed content for the Philips MyKitchen platform using ATG CMS.
- Improved platform accessibility and user experience for international audiences.

**Education**
